the new vivastation: designed around you from the top down

vivanext
be moved

PA system has both live and recorded announcements; automatic volume levels adjust based on time of day.

Tinted glass enhances comfort, reduces glare and improves visibility.

Innovative canopy design hangs over the vehicle, ensuring comfortable boarding and disembarking.

Vivastations can accommodate two vehicles as well as future LRT.

Riders can easily keep track of arrivals and service announcements in real-time with the message board.

Motion-activated heaters provide warmth while the new automated entry doors minimize heat loss.

Security surveillance and intercom for emergency assistance on platform.

Raised tiles along the platform edge provide greater awareness for the visually impaired.

Security cameras are installed at key points around the platform.

Emergency call button allows for two-way communication and triggers blue pulsing lights.

Signage helps direct riders with ease and clarity.

Fare payments made easy. Use cash, debit, credit, monthly passes or the new PRES-TO card.

Designated waiting area is marked for those who have paid their fare and validated their ticket.

Glass enclosure helps riders stay dry and sheltered all year round.
