

**YONGE
SUBWAY
EXTENSION**
LINE 1.

preliminary planning

designing an efficient network that works for everyone

Yonge Subway Extension

key benefits:

- It's the critical missing link in the dedicated regional rapid transit system and a vital gap in creating a seamless transit network in the GTHA.
- Eliminates the 2,500 bus trips per day required to accommodate current ridership along Yonge Street and significantly reducing traffic congestion.
- Saves over 28 tonnes of greenhouse gas [GHG] per workday by replacing the 2,500 bus trips currently servicing this segment of Yonge Street.
- Services a demonstrated need—with the potential ridership of 165,000 per day.
- Construction of the Yonge Subway Extension [YSE], will create thousands of design and construction jobs, and will provide lasting economic benefits to Toronto and York Region.
- Integrates with the Province's Regional Express Rail Program.

project overview

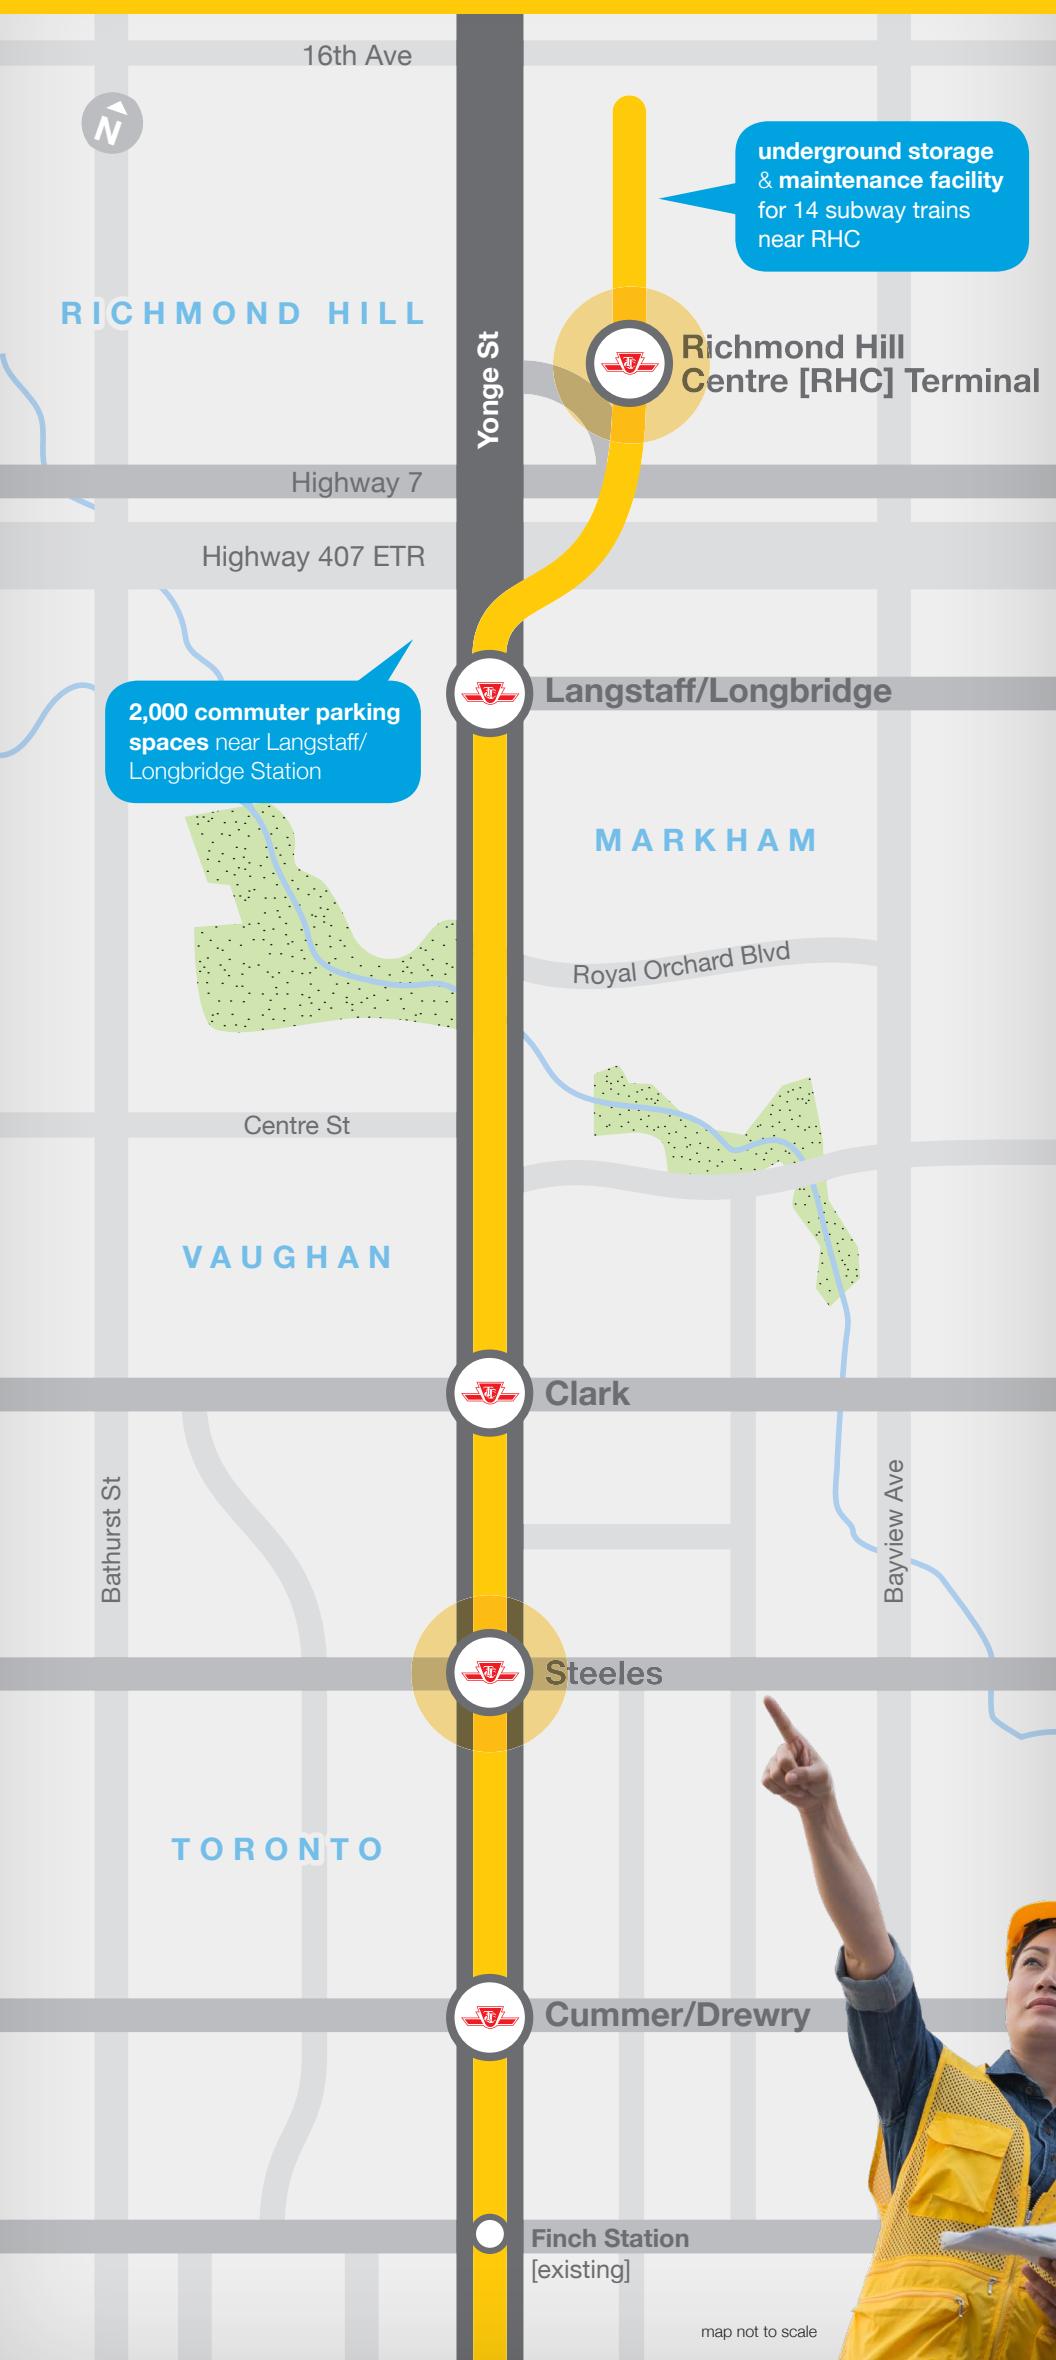

The planned Yonge Subway Extension [YSE] is a cross-jurisdictional project from the City of Toronto into the City of Vaughan, City of Markham and the Town of Richmond Hill.

The YSE is a 7.4 kilometre extension of the Yonge Subway Line 1 from Finch Station in Toronto to the Richmond Hill/Langstaff Gateway Urban Growth Centre at Highway 7 in Richmond Hill.

This critical rapid transit link will include five stations at:

- **Richmond Hill Centre***
- **Langstaff/Longbridge**
- **Clark**
- **Steeles***
- **Cummer/Drewry**

*Interregional bus terminals at these locations.

current status—preliminary planning, design and engineering

Metrolinx, the City of Toronto, the Toronto Transit Commission [TTC], The Regional Municipality of York and York Region Rapid Transit Corporation are working together in partnership to advance the Preliminary Design, and Engineering [PDE] phase of the YSE.

The PDE phase is intended to include all the necessary work to finalize the preliminary design and engineering for the YSE to between approximately 15% and 30%, in preparation for a decision on full funding and project readiness for procurement and delivery.

the PDE phase will also:

- Refine the project scope and develop a project schedule
- Complete an updated estimated project cost analysis
- Support an updated business case and economic analysis

what will I see?

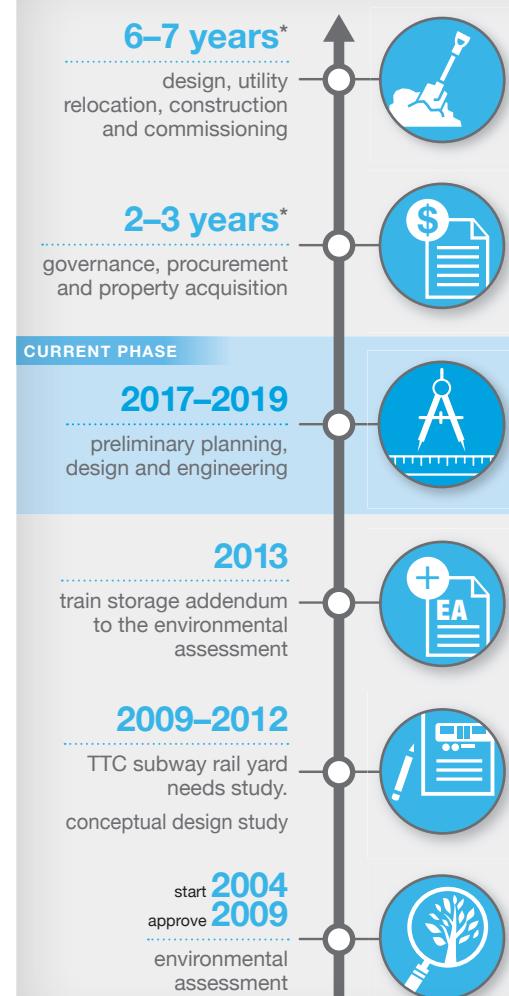

As part of this phase, crews will be surveying and conducting geotechnical testing along Yonge Street and some side streets from Finch Avenue in Toronto to the Richmond Hill/Langstaff Gateway Urban Growth Centre at Highway 7 in Richmond Hill.

funding for PDE phase

To complete the PDE phase for the YSE, the Government of Canada committed \$36 million and the Province of Ontario, through Metrolinx, committed \$55 million.

Long-term capital funding for the construction phase of the YSE has yet to be committed and will be required to proceed beyond the current PDE phase.

» project preliminary timeline

*Pending capital funding. Schedule subject to change.

connectivity

The YSE provides an alternative sustainable transportation option, improves quality of life and will make it easier for commuters to get where they need to go. It will reinforce the strong north-south and east-west connections by linking to destinations, urban centres and transit services across the Greater Toronto and Hamilton Area [GTHA].

Now more than ever, municipalities are intrinsically interconnected. With billions of dollars in new infrastructure investments over the next decade, the need to make smart, interconnected, forward thinking infrastructure investments has never been greater. A transportation network must be

designed for all users, and more efficient movements means greater network capacity, resulting in faster trips for all GTHA residents.

No matter where you work, no matter where you live, no matter where you want to play, you'll have access to everything—quickly and seamlessly.

keeping in touch

how can I provide input?

We are committed to engaging the public in a way that's transparent, inclusive and collaborative. We invite feedback at every stage of the process—both in person and online.
