location

- The Yonge Subway Extension [YSE] is a cross-jurisdictional project from the City of Toronto into the City of Vaughan, City of Markham, and the City of Richmond Hill.
- It runs along Yonge Street from Finch Avenue in Toronto to the Richmond Hill/Langstaff Gateway Urban Growth Centre at Highway 7 in Richmond Hill.

connections

- By extending the subway north to Richmond Hill we are creating an anchor hub that will link GO service, subway service, bus rapid transit and BRT/express service along Highway 407 ETR.
- The YSE will integrate with the Province’s Regional Express Rail Program.

funding

- To complete the PDE phase for the YSE, the Government of Canada committed $36 million and the Province of Ontario, through Metrolinx, committed $55 million.
- In April, 2019, the Province of Ontario announced $11.2 billion to support capital construction for four major rapid transit projects, including the Yonge Subway Extension.

key benefits

- Saves over 28 tonnes of greenhouse gas [GHG] per workday by replacing the 2,500 bus trips currently servicing this segment of Yonge Street.
- Services a demonstrated need—with the potential ridership of 165,000 per day.
- Construction will create thousands of design and construction jobs, and will provide lasting economic benefits to Toronto and York Region.

length and station information

- The YSE is a 7.4 kilometre extension of the TTC’s Line 1 from Finch Station in Toronto to the Richmond Hill/Langstaff Gateway Urban Growth Centre at Highway 7 in Richmond Hill.
- It will include up to 6 stations at Cummer/Drewry, Steeles, Clark, Royal Orchard [tbd], Langstaff/Longbridge and Richmond Hill Centre.
