

What are we studying?

We are undertaking a transit planning and assessment study for light rail transit on Don Mills Road and Leslie Street from Steeles Avenue to Highway 7.

Phase 1 (Spring and Summer 2009)

The first phase of the study will define the specific details of the LRT system, including:

- Number and locations of stations
- Cross-sectional elements (landscaping, pedestrian features, bike lanes, etc.)
- Intersection configuration
- Requirements for special track work
- LRT system requirements including electrical substations
- Terminal facility needs and interface with the Highway 7 Transitway and Highway 407 Transitway

Phase 2 (Fall 2009 and Winter 2010)

The environmental effects and mitigation for the preferred transit project will be assessed in accordance with the Transit Project Assessment Process, O.Reg. 231/08 during Phase 2.
